I just read the article "Bridging The Digital Divide" in Rural Missouri. I think it is fantastic that you are working on getting broadband to those of us who do not have access. I live in Montreal, Missouri not far from the Lake of the Ozarks. As of right now our internet option is Hughes Net satellite internet. With my plan I only get 250 mb per day which is not nearly enough to do work from home and computer homework for our kids after school. Other plans are too pricey for our budget. We are stuck. My children attend Camdenton RIII school which now requires much of their schoolwork to be done via computer. I know that there are many others around me that are having the same problems connecting to broadband as I am. I think your program is wonderful and I hope that we get the opportunity to use your services very soon. Thank you for your time.

Sincerely, Beth Gideon, Montreal, Mo
