Subject: Response to Questions posed by the BOC: How can the federal government best promote coordination and use of federally-funded broadband assets?

□ □ □

Focus on developing the minimum standard requirements. Encourage competition so that the resources that provide the services can be optimized to serve the population and their activities instead of current practice that support separation and the division of services. This way, investments can be streamlined towards optimization and standardization. To that extent, more security and efficiency can result from continuous improvements to create the infrastructure that will adequately support the needs of the growth of the communities that consume services.

Thank you very much for your correspondence.

Best regards,
Everet
