### Interaction Name

<table>
<thead>
<tr>
<th>Interaction Name</th>
<th>Interaction Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alternate Assignments</td>
<td>Alternate assignments for displaced systems requiring continued spectrum access must be granted.</td>
</tr>
<tr>
<td>Availability of Frequency Assignment</td>
<td>The AF Transition Plan is based heavily on the DoD Alternative Proposal and its success is critically dependent on the interaction of a number of interdependent elements including those activities of other federal agencies (e.g. DOJ Transition Plan). A number of these elements involve either replacing or modifying systems that will operate in alternate frequency bands. There will be a very large number of new frequency authorizations required in order to support the new operations. New authorizations must be in place prior to existing operations or authorizations being able to be terminated in the 1755-1780 MHz band. Given the large number of new frequency proposals that must be worked through the process and completed, there is concern that all necessary actions cannot be completed in time to ensure no loss of critical capabilities.</td>
</tr>
<tr>
<td>Environmental Impacts</td>
<td>This transition plan is dependent on the installation of new equipment at AMT, P5 ACTS, and other outdoor USAF installations which could be delayed due to extensive inclement winter (cold) and summer (extreme heat index) weather conditions as well as natural disaster such as earthquakes, hurricanes, floods, forest fires, etc. Extensive delays as a result of these catastrophic events will impact the ability of a range to complete its installation on the timelines submitted in this Plan. Delays for weather or catastrophic events have not been accounted for in this timeline analysis as noted in Tab D. An environmental impact statement (IAW NEPA) may be required by state and federal authorities for any AMT, P5 ACTS, or other site development. This process can take significant time and effort/costs to prepare and coordinate before any site preparation can be accomplished.</td>
</tr>
<tr>
<td>Frequency Coordination-1</td>
<td>Any non-Federal use of the 1755-1780 MHz band, in areas and frequencies designated for coordination, must be coordinated with incumbent DOD users through the DOD Coordination Portal using applicable coordination procedures. Use will not be permitted until such coordination is successfully completed or until the frequency assignment is discontinued in the applicable frequencies and areas.</td>
</tr>
<tr>
<td>General Funding-1</td>
<td>Successful transition in this frequency range will require a common means to exchange technical information and analysis results. DISA DSO plans to develop a portal for this exchange and has submitted a transition plan that contains the cost of $24.5M to develop and sustain this portal. If DISA DSO’s transition plan is not approved, then each Service may require additional funds, which is not currently captured within the Services' transition plans for development and sustainment of a portal. Therefore, if divided equally, the estimated additional cost each Service will need to include within its transition plans will be $8.17M, based on DISA DSO’s original, total cost submission.</td>
</tr>
</tbody>
</table>
**Interaction Name** | **Interaction Description**
--- | ---
**General Funding-2** | Furthermore, the successful implementation of the DoD Alternative Plan requires access to the frequency range 2025 - 2110 MHz which will require coordination with current incumbents. DISA DSO plans to develop a portal, with an analysis capability included, for this coordination and has submitted a transition plan that contains the cost of approximately $42.8M to develop and sustain a coordination portal. If DISA DSO’s transition plan is not approved, then each Service may require additional funds, which is not currently captured within the Services’ transition plans for development and sustainment of a portal. Therefore, if divided equally, the estimated additional cost each Service will need to include within its transition plans will be $14.27M, based on DISA DSO’s original, total cost submission.

**General Funding-3** | Auction funds are necessary for implementing new technological capabilities to relocate into alternative frequency band.

**Licensee Coordination with DoD Organizations** | To preclude any misunderstanding or misinterpretation, potential licensees must be advised that the DoD will provide direction to the military Services and other defense agencies to refer all requests for spectrum relocation information initiated by commercial wireless providers or their agents to the DoD CIO, Spectrum Policy and Program Directorate. The DoD CIO will establish a single focal point that will be responsible for establishing and overseeing procedures to facilitate information exchange between the DoD and wireless licensees.

**Sensitive Information that is not releasable to the public is included in the Transition Plan** | In accordance with 47 USC 929 - National Security and Other Sensitive Information, the Service Secretary has determined that public release of the information marked as sensitive/FOUO, taken in the aggregate as presented in this TP would reveal sensitive national security information. Withholding the sensitive information has no impact on fulfillment of this transition plan as the protection areas already identified are inclusive.

**Technology Development-1** | *****

**Technology Development-2** | The AF capability for RQ-11B Raven and RQ-20A Puma is based on Army SUAS research and development efforts. If that effort is delayed, there will be a corresponding impact to AFSOC SUAS transition planning.

**Technology Development-3** | The AF capability for RQ-12A Wasp-AE is based on Navy SUAS research and development efforts. If that effort is delayed, there will be a corresponding impact to AFSOC SUAS transition planning.

**Technology Development-4** | The necessary AF developmental technologies for C2 and Tactical ROVERs will progress as expected. Any RDT&E delay will result in a corresponding impact to AF ROVER transition planning.
### Interaction Name

<table>

<tbody>
<tr>
<td>Timeline Conditions for Coordination</td>
<td>The coordination process that wireless licensees will be required to follow includes the DoD requirement to perform associated analyses of potential interference from wireless licensee build-out plans. The DoD will, by necessity, be required to respond to numerous industry coordination requests on specific timelines. This coordination effort will be conducted through a DoD web-based portal capability, which will require time to develop and implement. Given that SRF funding to initiate the development of the DoD portal will not be available until months after the auction and award of licenses, a full coordination capability will not be in operation until early 2016, at the earliest. The timeline noted in Tab D assumes a baseline of 3 months from the close of the auction to the receipt of funds, and an estimated 9 months for portal development. A full coordination capability is projected for early 2016, at the earliest. Additional time past the 12 months reflects requirements to implement transition objectives.</td>
</tr>
<tr>
<td>Timeline Conditions for Receipt of Funds</td>
<td>All timelines in this plan are based on the assumption that funding will be received by DoD three months after the close of the auction. Should the receipt of funds change, timelines may need to be adjusted accordingly.</td>
</tr>
<tr>
<td>Factor Name</td>
<td>Factor Description</td>
</tr>
<tr>
<td>-------------</td>
<td>--------------------</td>
</tr>
<tr>
<td>1</td>
<td>Spectrum Certification: This Transition Plan is based on the DoD Alternative Proposal for the 1755-1780 MHz band; details can be found in Plan Notes (Additional Information). As part of the Transition Plan, some systems will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands, while other systems will be retuned or modified to operate in other federal bands. All modified equipment will be required to undergo the spectrum certification process through the NTIA Spectrum Planning Subcommittee (SPS) IAW OMB Circular A-11, Section 31.12(c). This certification is required before agencies can submit estimates for the development or procurement of major radio spectrum-dependent communications-electronics systems. The spectrum certification process through the NTIA Spectrum Planning Subcommittee can require a number of months to complete for routine equipment developments. It is anticipated that due to the numerous simultaneous certification requests required to enable the modification and/or replacement of the systems identified in this and other agencies' Transition Plans, there will be a significant backlog within the SPS process. It should also be noted that the spectrum certification process is required at each stage of a program's development and thus some of the modified or relocated systems may be required to undergo the SPS review process multiple times. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems receive spectrum certification approval from the SPS.</td>
</tr>
<tr>
<td>2</td>
<td>Frequency Authorization: All systems that require either different frequency assignments in the 1780-1850 MHz band, modification to operate in both the 1780-1850 MHz and 2025-2110 MHz frequency bands, or relocation to operate in other federal bands will have to follow the frequency authorization process in order to obtain new frequency authorizations. It is understood that NTIA intends to essentially &quot;reserve&quot; frequency assignments in the alternate spectrum bands based on the data provided in this Transition Plan; however, the formal frequency authorization process through the NTIA Frequency Assignment Subcommittee (FAS) must still be completed at a future time, subsequent to the associated SPS certification process for the systems/equipment and prior to actual operations in the alternate bands and verification/validation of comparable technical capability. These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems become operational in dual or alternate frequency bands as defined by the Transition Plan. DoD notes that, consistent with the CSMAC WG-4 Final Report (July 24, 2013), existing DoD TRR operations will continue in the 1755-1780 MHz band in regions where there is little or no commercial broadband deployment in this band.</td>
</tr>
<tr>
<td>3</td>
<td>Federal Communications Commission (FCC) band allocation rules development and adoption. The allocation for and use of this band by non-federal fixed and mobile users will require the development of specific technical rules governing non-federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The development of these rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that potential licensees are fully aware of the requirements that they must comply with to begin operations in the band.</td>
</tr>
<tr>
<td>Factor Name</td>
<td>Factor Description</td>
</tr>
<tr>
<td>-------------</td>
<td>--------------------</td>
</tr>
<tr>
<td><strong>4</strong></td>
<td>Development of Coordination Guidelines For Federal Agencies and Industry: Given the fact that most federal operations will still be in the band upon the award of licenses by the FCC and some federal operations will continue indefinitely in the band, specific coordination guidelines must be developed and published by NTIA (for federal agencies) and the FCC (for non-federal licensees). The formal development of these coordination procedures has not yet begun by NTIA and the FCC, but they will be essential to any early entry by non-federal licensees.</td>
</tr>
<tr>
<td><strong>5</strong></td>
<td>National Telecommunications and Information Administration (NTIA) band allocation rules (2025-2110 MHz) development and adoption. The allocation for and use of the 2025-2110 MHz band by federal fixed and mobile users will require the development of specific technical rules governing federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The development of these rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that federal agencies are fully aware of the requirements that they must comply with to begin operations in the 2025-2110 MHz band.</td>

<td>Some Air Force serial number entries are identified as &quot;Vacate With Temp&quot;. As defined in the 1755-1780 MHz Band NTIA Transition Plan Guide dated 22 November 2013, &quot;Vacate with Temp&quot; means that the assignment will ultimately be vacated but temporary geographic frequency sharing will be allowed for some period of time during the relocation based on coordination and a negotiated sharing arrangement. The concept of &quot;temporary sharing&quot; is subject to several conditions. These include: the requirement for the 1755-1780 MHz Early Entry Portal to be operational to handle coordination requests; coordination requests will be addressed on a site-by-site basis and sharing conditions shall be approved by the Military test range facility affected; sharing considerations will be assessed based on industry build-out/deployment plans and incumbent DoD operations; and a recognition that industry be aware that sharing may be assessed as not feasible for an extended period of time. Industry should not assume that a &quot;Vacate With Temp&quot; indicates that sharing for that frequency assignment is assured. The label only means that DoD is agreeable to determine if sharing is feasible in response to individual industry coordination requests.</td>
</tr>
<tr>
<td>12</td>
<td>Timeline Tab, the number provided in the “Temporary Sharing” column denotes the months after the award of licenses by the FCC (i.e., start of the transition period), when the agency will begin coordination with auction winners to allow for temporary geographic sharing pursuant to an applicable sharing coordination process.</td>

<tr>
<td>17</td>
<td>This Transition Plan, as well as the key assumptions for those programs which it addresses, is based on the July 2013 DoD Alternative Proposal for the 1755-1780 MHz band. The DoD alternative proposal constitutes a workable balance to provide unencumbered access to the 1755-1780 MHz band most desired by the commercial wireless industry while ensuring no loss of critical Federal capabilities. The DoD Alternative Proposal is comprised of the following elements which are highly interdependent and must be implemented as a collective set in order to successfully maximize industry access to the 1755-1780 MHz band. In addition, the individual elements will require funding and time to execute:</td>
</tr>
<tr>
<td>Note Name</td>
<td>Note Text</td>
</tr>
<tr>
<td>-----------</td>
<td>-----------</td>
</tr>
</tbody>
</table>
| 17-1      | 1. DoD will modify selected systems to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands. This element is dependent on a change being accomplished to the US Table of Frequency Allocations to incorporate FIXED and MOBILE Federal use on a primary basis with associated amplifying footnotes that have been coordinated with the FCC. The selected systems that will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands include:  
• Small Unmanned Aerial Systems (SUAS)  
• Tactical Targeting Network Technology (TTNT)  
• Tactical Radio Relay (TRR)  
• High Resolution Video systems (HRV) |
| 17-10     | 2. DoD will modify selected systems to operate in other existing Federal bands as identified in its September 2011 Feasibility Study:  
• Precision Guided Munitions (PGMs) to 1435-1525 MHz  
• Point-to-Point Microwave Links to 7125-8500 MHz  
• DoD Video Surveillance/Robotics to 4400-4940 MHz |
| 17-11     | 3. DoD systems will continue operations in the 1755-1780 MHz band on a shared basis with commercial users as follows:  
• Satellite Operations (SatOps) will remain in the 1755-1780 MHz band as commercial broadband operations will be required to accept interference from SatOps.  
• Electronic Warfare (EW) (on a non-interference basis)  
• Air Combat Training System (ACTS) (where required). DoD will, over time, make adjustments to the current ACTS frequency assignments that exist throughout the 1755-1850 MHz band such that those assignments in use in proximity to metropolitan areas and high-value industry market areas will all be above 1780 MHz and as many as possible of those remaining in the 1755-1780 MHz band will be limited to very rural and remote areas where licensees are not expected to plan to build out LTE networks in this band.  
• Joint Tactical Radio System (JTRS) at six key sites identified in the DoD Feasibility Study. |
| 17-12     | 4. DoD will plan to compress the remaining operations into the 1780-1850 MHz band. |
| 17-13     | 5. DoD will consequently not require access to the 5150-5250 MHz band, thus allowing the FCC to modify its current rules to expand the use of unlicensed mobile broadband devices in this band. |
| 18        | AF 103102, AF 103103, AF 103104, and AF 122767: These assignments do not conform to the table of allocations, and operate under NIB status. Operations pose a very limited intereference impact. |

| 20        | ***** |
| 21        | ***** |
| 22        | ***** |
Below is the explanation for the AMT transition based on the following cost elements for each of its Test Ranges. These are noted in two segments: (1) Baseline which applies to each USAF Test Range, and (2) Installation specific elements.

### Baseline Cost Elements for the USAF Test Ranges:

1. **#1** Replace USAF Test Range AMT ground site receivers with new telemetry systems that provide a 2 to 3-fold increase in spectral efficiency.

2. **#3** Develop end-to-end system test procedures and perform the flight test between modified test aircraft with the modified TM Transmission Segment and modified AMT Receiver Systems.

3. **#4** Upgrade the Scheduling and de-confliction software to identify the required mission bandwidth for the TM transmitter being scheduled and allow the software program to adjust the scheduled frequencies to maximize spectral efficiency to reduce the risk of cancelling missions due to inadequate available spectrum. This is a total cost estimate by the USAF and will be utilized at the USAF Test Ranges.

### Site Specific USAF Test Ranges:

For Edwards AFB:

- **#1** Procure and install multi-band, bandwidth-efficient telemetry transmit subsystems replacing the existing transmitters in selected aircraft used in flight test operations. This element also includes technical studies for development of the transmitter acquisition documentation, power dividers, multi-band antennas installation of the transmitters, T-2 Modification documentation packages, and spares.

For Eglin AFB:

- **#3** Procure and integrate into the Edwards range three mobile/transportable telemetry vans to augment the existing fixed sites.
<table>
<thead>
<tr>
<th>Note Name</th>
<th>Note Text</th>
</tr>
</thead>
<tbody>
<tr>
<td>23-24</td>
<td>#2) Procure and install Flight line uplink command and control function to each test aircraft to allow for changing the frequency and modulation of the test aircraft without having to remove the transmitter pallet from the aircraft. With the compressed band, there will be frequency changes to each test aircraft due to the high usage at Eglin. This modification will allow for rapid change of the frequency and modulation without the risk damage to the test aircraft and will minimize the number of aircraft inspections prior to each flight. This cost element includes the software and hardware to implement this function.</td>
</tr>
<tr>
<td>23-25</td>
<td>*****</td>
</tr>
<tr>
<td>23-26</td>
<td>#4) Procure and integrate into the Eglin’s range three mobile/transportable telemetry vans to augment the existing fixed sites.</td>
</tr>
<tr>
<td>23-27</td>
<td>*****</td>
</tr>
<tr>
<td>23-28</td>
<td>#6) After the completion of the East Range installations and release of the 1755-1780 MHz to the 11 designated Major Market areas identified in #5 above, Eglin will initiate action on its West Range. This effort is estimated to complete approximately 120 months after auction and at this point, Eglin will relinquish the remaining 1755-1780 MHz portion of the band to the cell industry to gain use in the remaining Major Market areas affected by Eglin’s TM operations. These markets include: Nashville, Memphis, Birmingham, Mobile, and New Orleans.</td>
</tr>
<tr>
<td>23-29</td>
<td>Vandenberg AFB</td>
</tr>
<tr>
<td>24</td>
<td>USAF ACTS: Transition Planning is based on the following cost elements for each of its Training sites and are noted below:</td>
</tr>
<tr>
<td>24-1</td>
<td>*****</td>
</tr>
<tr>
<td>24-10</td>
<td>#2) The ACTS compression will require major software modifications as well as new software to provide the system the ability to operate in all areas of the CONUS without impacting the Wireless Industry operations below 1780 MHz. The anticipated software efforts are described below: a) Software Modifications, b) Mission Line Up (MLU) Software Within Ground Subsystem (GS), c) Add Control of Frequency Assignments Based Upon Geographic Area, d) Advanced Data Interface Unit (ADIU) Software in Pod, e) Update to Process Multipoint Polygon Area for Frequency Management, f) Add Support for Dynamic Frequency Management for Autonomous Ops, g) Firewall (FW) Software Within GS, h) Provide Acknowledgements of Uplinks to Remote Slave Live Monitors, i) Display &amp; Debriefing System Software in GS, j) Add Support for New Training Range Network Manager Software, k) Update to Filter Network Traffic Based Upon Geographic Area, New Software, l) New Training Range Network Manager Software, and m) Provide Dynamic Frequency Management for Autonomous Instrumentation Pod Operations Across Large Geographic Areas</td>
</tr>
<tr>
<td>24-11</td>
<td>#3 The ACTS modification will be verified and validated through a formal test program which will include both ground and flight test. Formal test plans and procedures will be developed for the conduct of the test.</td>
</tr>

<tr>
<td>26</td>
<td>Commercial coordination and demonstration of ability to accept/tolerate SATOPS interference should be required prior to deployment within earth station contours per CSMAC recommendations and AF Space Command/A3S input. DoD’s plan includes a Spectrum Sharing Testing/Demo Program, during which tolerance to SATOPS interference will be evaluated. Results of this program may satisfy coordination requirements for commercial operations within some or all earth station contours.</td>
</tr>
<tr>
<td>27</td>
<td>Full funding is required prior to auction for two SATOPS RBC Non-Recurring Engineering activities and RBC Baseline Documentation and ECP/CCB/MCB work. These activities are scheduled to begin prior to and finish shortly after the auction, and full funding is required to prevent disruptions to work and ensure all other (post-auction) activities begin when planned. SMC also requires all RFI monitoring funding and 1780-1850 MHz band compression pre-coordination activities funding prior to auction.</td>
</tr>
<tr>
<td>28</td>
<td>SATOPS pre-auction funds are necessary to model interference probability surrounding federal earth stations in order to identify geographic boundaries for coordination requirements.</td>
</tr>
<tr>
<td>29</td>
<td>*****</td>
</tr>
<tr>
<td>3</td>
<td>Transmissions of federal SATOPS earth stations represent potential interference to commercial systems. The ability to conduct successful coordination prior to the installation of new commercial systems within the potential interference envelope of federal SATOPS earth stations will be required to implement this transition plan and share this spectrum, in accordance with CSMAC WG3 Report recommendations.</td>
</tr>
<tr>
<td>30</td>
<td>Adequate protection distances based on CSMAC analyses need to be established for all affected AF systems. Failure to establish such distances could hinder implementation of the transition plan.</td>
</tr>
<tr>
<td>31</td>
<td>Specific regulations are required to protect AMT/P5ACTS receivers from out-of-band emissions (OOBE) from commercial wireless systems. This protection should include the requirements as set forth by ITU-R Rec. M.1459. Additionally, a process must be developed and approved for immediate LTE commercial wireless systems shutdown if and when &quot;rogue&quot; interference occurs. If the commercial wireless systems experience interference from Federal operations, a process must be developed and approved for the resolution of this type of interference.</td>
</tr>
<tr>

Combining frequency with emission designator, location, organization or function result in a compilation that must be protected accordingly because they can provide information leading to the disclosure of military or national security related operations, or scientific and technological matters relating to the national security. Groupings of this type of data can indicate the overall strategic telecommunication capabilities of the United States, and their disclosure could cause damage to the national security. The continued protection of this information is essential to the national security. MCEB-M-001-12, dtd 9 Nov 12 and 412 TENG Critical Information List.
