Interaction Name	Interaction Description
Spectrum Monitoring	If Spectrum Monitoring identifies interference from commercial wireless to Department of the Navy (US Navy and/or US Marine Corps) systems, promptly inform the NTIA regulators. Document interference in a report and work with NTIA and FCC on resolution.

Releasable

DOD\N 3550-3650 (Rev. 2) (Sufficient) - Impact Factors

Factor Name	Factor Description
Sensitive Information that is not releasable to the public is included in the Transition Plan	In accordance with 47 USC 929 - National Security and Other Sensitive Information, the Service Secretary has determined that public release of the information marked as sensitive U//FOUO, taken in the aggregate as presented in this TP would reveal sensitive national security information. Withholding the sensitive information has no impact on fulfillment of this transition plan as the protection areas already identified are inclusive. The information deemed sensitive is: Tab Frequencies [Center Lower Frequency Limit (MHz), Upper Band Limit (MHz) (if appl), Emission Bandwidth (MHz), Receiver Bandwidth (MHz), Operation Area, Transmitter Latitude, Transmitter Longitude, Receiver Latitude, and Receiver Longitude, Alternate Frequency Assignment (if appl)], and Tab Notes, as applicable.

DOD\N 3550-3650 (Rev. 2) (Sufficient) - Notes

Note Name	Note Text
01-Sharing Costs	<p>All requested funding in the DoD Transition Plans is an allowable use of the Spectrum Relocation Fund for the 3550-3650 MHz band. DoD is entitled to full protection as the incumbent under the CBRS sharing rules and is currently incurring sharing costs in connection with the auction of 3550-3650 MHz Priority Access Licenses (PAL). The transition activities are required to maintain comparable capability in terms of risk of interference and DoD’s ability to address any interference that may occur, at least equivalent to the risk and ability to mitigate interference as before the Citizens Broadband Radio Service (CBRS) sharing arrangement and PAL auction.</p> <p>Prior to the sharing arrangement, the DoD was able to effectively operate all of its spectrum dependent systems in the 3550-3650 MHz band. DoD’s implementation of an indefinite sharing arrangement with new uses and users in the 3550-3650 MHz band inevitably involves the sharing costs as identified in 47 U.S.C. §923(g)(3). To ensure comparable operations and capabilities, DoD is and will continue to incur costs to mitigate against harmful interference to its protected operations.</p> <p>The proposed activities are required to ensure DoD incumbent operations are protected. Any expanded capabilities are incidental to establishing the core capability that is needed for sharing the 3550-3650 MHz band with CBRS.</p>
02-Executive Summary	<p>The Department of the Navy (DON) 3550-3650 MHz Transition Plan utilizes three means to ensure Navy and Marine Corps systems maintain current capabilities in a shared environment. The first objective is utilizing EME Monitoring and Sensing to confirm operations continue at full, pre-auction capability and performance level. Navy and Marine Corps will procure spectrum monitoring capabilities for installation at key facilities for data collection. DON will monitor effects of the environment to evaluate impacts to system performance. EME monitoring is required to sense the actual environment at topographically unique locations and protect radars while ensuring operational security. The second objective is incorporating the use of Navy ships and complex Marine Corps systems into the CBRS Sharing Ecosystem Assessment being conducted as part of the DISA DSO Transition Plan. The third objective is to support the continued refinement of the sharing paradigm to account for the changing CBRS environment. This will be accomplished through engagement with industry and other federal agencies, conducting sharing protocol assessments with CBRS licensees targeting Always-on and Portal dynamic protection areas (DPA), and providing ships with mechanisms to determine DPA locations for interference resolution. The engineering and sharing support component of the DON Transition Plan will provide the DON with qualified personnel for working group coverage and engineering management needed to implement the DoD sharing strategy, in coordination with industry, NTIA, and FCC.</p>
