DOJ\DOJ 1755-1780 (Rev. 5) (Sufficient) - Interactions

Interaction Name	Interaction Description
1. Pre Auction Funds	It is assumed that Pre Auction Funds will be available in FY-14 for Pre Auction Planning of several key initiatives of the DOJ relocation strategy. Pre auction planning is crucial to the deployment timing of Adaptive Central Receive System and its associated components.
10. Adjustments To Base Budget	Reductions to the original DOJ Transition Plan were made at the request of the Technical Panel, including transitioning recurring costs beyond three years to annual Adjustments To Base Budget (ATB). This increases the risk for this transition plan because it now relies upon ATB during the deployment phase for success. At this time, this risk is rated as high.
11. DOJ Cost Reduction Risk	The Department of Justice's (DOJ) revised transition plan includes an estimated total transition cost of \$1.1 billion for planning and auction scoring purposes. This \$1.1 billion estimate may increase or decrease based on continued review, including the results from a third-party cost review that will begin within the next few weeks. The execution of the funding may also shift during the transition implementation. The Department has worked closely with the Technical Panel to address questions and revise our transition plan based on Technical Panel direction, including changing the structure of recurring costs, eliminating a DOJ contingency reserve, and accepting a certain level of risk, particularly related to commercial service costs and potential price inflation. To reach the planning estimate of \$1.1 billion, the Department has reduced its cost estimate by approximately \$72 million in commercial services and \$93 million in other areas from its most recent estimate of \$1.265 billion. Overall, the Department has cut over \$524 million from its initial transition estimate of \$1.624 billion in order to meet the \$1.1 billion planning estimate. The Department's top priority is to ensure that law enforcement agencies do not lose surveillance capability after the AWS-III auction. This plan maintains comparable operational capability, but we are concerned that any further reductions, pending the third-party review, will compromise the ability of the Department to carry out its mission, including criminal investigations and national security matters. The Department will continue to review its cost estimates through the pending independent review and will revise the cost estimates based on the outcome of that review.
12. Temporary Sharing	For each of the frequency entries within Tab C that are labeled as "Vacate With Temp", the following stipulation applies: The concept of "temporary sharing" is subject to several conditions and these include: coordination requests will be addressed on a site-by-site basis and sharing conditions shall be approved by DOJ; sharing consideration will be assessed based on industry build-out/deployment plans and incumbent DOJ operations; and a recognition that industry be aware that sharing may be assessed as not feasible for an extended period of time. Industry should not assume that the label of "Vacate With Temp" indicates that sharing for that frequency is in any way assured. The label only means that DOJ is agreeable to determine if sharing is feasible in response to individual industry coordination requests. As noted in Tab D of this transition plan, in the "Begin Temporary Sharing" column, DOJ will begin discussions and coordination of sharing 12 months prior to the "Vacate Assignment" dates listed in Tab D.

Interaction Name	Interaction Description
2. Sensitive Information that is not releasable to the public is included in the Transition Plan.	The redacted information will not impede fulfillment of the transition plan
3. Alternate Frequency Assignments	L Band = 1780-1850Mhz, C Band = 4400-4940Mhz, X Band = 8100-8500Mhz, S Band = 2200-2290Mhz
4. Tab D , Vacate Assignment Column	Dates are dependant on DOJ receipt of funds by May 2015
5. Tab E, Begin and End Expenditure of Funds Columns	Dates are dependant on DOJ receipt of funds by May 2015
6. Tab E, Expenditure of Funds beyond Vacate Spectrum Date	Funding is required beyond the Spectrum Vacate Date in order to build out the nationwide Adaptive Central Receive System and associated components
7. Tab E, Expanded Capability Costs	*****
8. Commercial Broadband Costs	The Commercial Broadband cost estimates are based on our ability to accurately estimate the future costs of broadband services. Existing contracts expire in 2014. At this time, this risk is rated as medium.
9. Vendor Costs and Schedule	The plan is dependant on vendors being able to meet DOJ's estimated costs and schedules. At this time, this risk is rated as low.

DOJ\DOJ 1755-1780 (Rev. 5) (Sufficient) - Impact Factors

Factor Name	Factor Description
1	New frequency assignments in the GMF are required to be approved by NTIA by 12/31/2014 in the S and C Bands. This includes US&Ps throughout 2200 - 2290Mhz, 4400 - 4500 and 4600 - 4900 to include Band Assignments if required by NTIA.
2	New frequency assignments in the GMF will be required to be approved by NTIA by 12/31/2014 in the L Band. This also includes assignments for a central receive control channel in each metropolitan area.
3	New Point to Point frequency assignments in GMF will be required in 8100 - 8500Mhz.
4	NTIA assistance with Commercial Carriers regarding their proposed dramatic increase in commercial services costs for Mobile Broadband is required.
