E-mail: david.a.pierce2.civ@mail.mil

Certification regarding Classified and Sensitive Information:

I, Margaret McBride, certify that this transition plan, is cleared for release to the public and contains no classified or sensitive information. A separate version containing a complete transition plan including all sensitive data is provided under separate cover via authorized channels.

Name: Margaret McBride
Title: Public Affairs Officer
Organization: Army CIO/G-6

DOD Transition Plan for 1755-1780 MHz Band

Tab B: General Information

1	This Transition Plan includes pre-auction planning costs, as defined in Section O.2 of Annex O:		
	a. Total pre-auction planning costs:		\$2.020
	b. The subtotal amount, if any, of pre-auction planning costs requested for pre-auction transfer:		\$0.958
	c. The subtotal amount, if any, of pre-auction planning costs incurred after June 28, 2010, but before February 22, 2012:		\$0.408
	d. This organization attests that:		
	[1] To the fullest extent possible, this transition plan provides for sharing and coordination of eligible frequencies with non-federal users, including reasonable accommodation for the use of eligible frequencies by non-federal users during the transition period.	Yes	
	[2] This transition plan provides for non-federal users to be able to use eligible frequencies during the transition period in geographic areas where this organization does not use such frequencies.	Yes	
	[3] During the transition period, this organization will make itself available for negotiation and discussion with non-federal users not later than 30 days after a written request.	Yes	
	[4] During the transition period, this organization will make available to a non-federal user with appropriate security clearances any classified information regarding the relocation process, on a need-to-know basis.	Yes	
	[5] (Only applicable if the amount in 1b above is greater than \$0.00.) Funds transferred before an auction likely allow for timely implementation of relocation or sharing, thereby increasing net expected auction proceeds by an amount not less than the time value of the amount of funds transferred.	Yes	
2	There is additional information required to be included in the Transition Plan that is not included in this document because it is classified information, as defined in Section O.7 of Annex O.	No	
3	There is additional information required to be included in the Transition Plan that is not included in this document because it is <u>sensitive</u> information, as defined in Section O.7 of Annex O.	Yes	
4	This Transition Plan includes both sensitive and unclassified information and comprises a full version of the Transition Plan for this agency. The only information that has been excluded are those elements that are classified. (Note: A version of this plan that contains only publicly releasable information is provided separately.)	No	
5	a. Name of Responsible Officer:	Stevan Jovancevic	
	b. (Optional) Office:		
	c. (Optional) Telephone Number:		
	d. (Optional) E-mail:		
6	Total Transition Plan Cost (\$M):		\$709.821

****	Army Microwave		AR-1				\$ 42.0	\$ 1.2	43.200	6	120		none	Additional real estate cost and/or tower strengthening to support the additional weight of 7/8 GHz Systems. Recrystallize in 36 months and move to 1780-1850 MHz in order to make the 1755-1780 MHz band available to industry at the earliest opportunity. Complete move to 7/8 GHz within 120 months after initial funding. The move to 7/8 GHz is required to enable other highly mobile ground and airborne DoD systems to maximize compression into the 1780-1850 MHz band. The prioritization of locations for this program to transition operations out of the 1755-1780 MHz band will be made as consistent as possible with the industry provided market prioritization list from the CSMAC WG-2 Report. The Program Office will use the CSMAC prioritization to the extent feasible.

DoD Transition Plan for 1755-1780 MHz Band
Tab F: NTIA Interactions

	Interaction required with NTIA to implement this Transition Plan
1	<p><u>Spectrum Certification:</u> This Transition Plan is based on the DoD Alternative Proposal for the 1755-1780 MHz band; details can be found in Tab I (Additional Information). As part of the Transition Plan, some systems will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands, while other systems will be retuned or modified to operate in other federal bands. All modified equipment will be required to undergo the spectrum certification process through the NTIA Spectrum Planning Subcommittee (SPS) IAW OMB Circular A-11, Section 31.12(c). This certification is required before agencies can "submit estimates for the development or procurement of major radio spectrum-dependent communications-electronics systems". The spectrum certification process through the NTIA Spectrum Planning Subcommittee can require a number of months to complete for routine equipment developments. It is anticipated that due to the numerous simultaneous certification requests required to enable the modification and/or replacement of the systems identified in this and other agencies' Transition Plans, there will be a significant backlog within the SPS process. It should also be noted that the spectrum certification process is required at each stage of a program's development and thus some of the modified or relocated systems may be required to undergo the SPS review process multiple times.</p> <p>These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems receive spectrum certification approval from the SPS.</p>
2	<p><u>Frequency Authorization:</u> All systems that require either different frequency assignments in the 1780-1850 MHz band, modification to operate in both the 1780-1850 MHz and 2025-2110 MHz frequency bands, or relocation to operate in other federal bands will have to follow the frequency authorization process in order to obtain new frequency authorizations. It is understood that NTIA intends to essentially "reserve" frequency assignments in the alternate spectrum bands based on the data provided in this Transition Plan; however, the formal frequency authorization process through the NTIA Frequency Assignment Subcommittee (FAS) must still be completed at a future time, subsequent to the associated SPS certification process for the systems/equipments and prior to actual operations in the alternate bands and verification/validation of comparable technical capability.</p> <p>These interactions will begin soon after this Transition Plan is approved and will continue until all affected systems become operational in dual or alternate frequency bands as defined by the Transition Plan.</p> <p>DoD notes that, consistent with the CSMAC WG-4 Final Report (July 24, 2013), existing DoD TRR and JTRS Ground based operations (at non-Exclusion Zones sites) will continue in the 1755-1780 MHz band in regions where there is no commercial broadband deployment in this band. Please refer to timeline of TRR and JTRS systems in Tab I.</p>
3	<p><u>Federal Communications Commission (FCC) band allocation rules (1755-1780 MHz) development and adoption.</u> The allocation for and use of the 1755-1780 MHz band by non-federal fixed and mobile users will require the development of specific technical rules governing non-federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that potential licensees are fully aware of the requirements that they must comply with to begin operations in the band.</p>
4	<p><u>Development of Coordination Guidelines For Federal Agencies and Industry:</u> Given the fact that most federal operations will still be in the band upon the award of licenses by the FCC and some federal operations will continue indefinitely in the band, specific coordination guidelines must be developed and published by NTIA (for federal agencies) and the FCC (for non-federal licensees). The formal development of these coordination procedures begun by NTIA and the FCC, will be essential to any early entry by licensees as well as for the long term sharing coordination that will be required.</p>

	Interaction required with NTIA to implement this Transition Plan
5	<p><u>National Telecommunications and Information Administration (NTIA) band allocation rules (2025-2110 MHz) development and adoption.</u> The allocation for and use of the 2025-2110 MHz band by federal fixed and mobile users will require the development of specific technical rules governing federal operations, such that sharing of the band between federal and non-federal users is feasible and jointly successful. The rules will be critical to the successful implementation of the DoD Alternative Proposal and the associated transition of systems addressed in this plan from the band. These rules must be adopted prior to the auction of the 1755-1780 MHz band such that federal agencies are fully aware of the requirements that they must comply with to begin operations in the 2025-2110 MHz band.</p>

Tab G: Identification of Excluded Classified and Sensitive Information

Serial Number	Description of Classified or Sensitive Information	Reason for Exclusion	Reference
All	<p>The sensitive information withheld includes the Center Frequency/Lower Band Limit, Upper Band Limit, Emission Bandwidth, RX IF Bandwidth, Non-Releasable System Name, Authorized Area of Operation, Transmit Latitude and Longitude, Receiver Latitude and Longitude, and Alternate Frequency Assignment. This information is currently designated as FOR OFFICIAL USE ONLY and is considered to have a legal basis for nondisclosure and public disclosure of this information would be detrimental to national security. Note: DoD policy and procedures for marking, use, and protection of FOUO information is in the process of migrating to the Controlled Unclassified Information (CUI) program provided under EO 13556. As this time, specific DoD CUI categories are in the process of being registered and will eventually serve as the basis for protection of this type of unclassified information. While additional DoD CUI categories are being considered, the specific DoD CUI categories that the noted FOUO information is expected to transition to include:</p> <ul style="list-style-type: none"> Defense (Material and Munitions): System Name Controlled Technical Information: Center Frequency/Lower Band Limit, Upper Band Limit, Emission Bandwidth, Rx IF Bandwidth Critical Information (Operations Security). Latitude/Longitude, Area of Operation, Alternate Frequency Assignment. 	Sensitive	<p>Executive Order 13556: Controlled Unclassified Information, and</p> <p>DoD Manual 5200.01, DoD Information Security Program: Controlled Unclassified Information, Volume 4, February 24, 2012, and</p> <p>10 USC §130; Authority to withhold from public disclosure certain technical data</p> <p>DoD/CIO letter to Dept of Commerce, Asst Secretary for Communications and Information, February 21, 2014</p>

	Factor	Impact on Fulfillment of Transition Plan
1	Classified or Sensitive Information that is not releasable to the public is included in a separate non-releasable version of this Transition Plan.	This factor will have no impact on fulfillment of this Transition Plan.
2	Availability of Spectrum Relocation Fund (SRF) Funding	Impact on Fulfillment of Transition Plan: All timelines in this plan are based on the assumption that funding will be received three months after the close of the auction. Should the receipt of funds change, timelines may need to be adjusted accordingly.
3	Availability of Frequency Assignment Authorizations	As described in Tab I, this Transition Plan is based heavily on the DoD Alternative Proposal and its success is critically dependent on the interaction of a number of interdependent elements including those activities of other federal agencies (e.g. DOJ Transition Plan). A number of these elements involve either replacing or modifying systems that will operate in alternate frequency bands. There will be a very large number of new frequency authorizations required in order to support the new operations. New authorizations must be in place prior to existing operations or authorizations being able to be terminated in the 1755-1780 MHz band. Given the large number of new frequency proposals that must be worked through the process and completed, there is concern that all necessary actions can be completed in time to support all of the new operations.
4	Licensee Coordination With DoD organizations	To preclude any misunderstanding or misinterpretation, potential licensees must be advised that the DoD will provide direction to the military Services and other defense agencies to refer all requests for spectrum relocation information initiated by commercial wireless providers or their agents to the DoD CIO, Spectrum Policy and Program Directorate. The DoD CIO will establish a single focal point that will be responsible for establishing and overseeing procedures to facilitate information exchange between the DoD and wireless licensees.

UNCLASSIFIED
DoD Transition Plan for 1755-1780 MHz Band
Tab I: Additional Information

	This Transition Plan, as well as the key assumptions for those programs which it addresses, is based on the July 2013 DoD Alternative Proposal for the 1755-1780 MHz band. The DoD alternative proposal constitutes a workable balance to provide unencumbered access to the 1755-1780 MHz band most desired by the commercial wireless industry while ensuring no loss of critical Federal capabilities. The DoD Alternative Proposal is comprised of the following elements which are highly interdependent and must be implemented as a collective set in order to successfully maximize industry access to the 1755-1780 MHz band. In addition, the individual elements will require funding and time to execute:
1	DoD will modify selected systems to operate in both the 1780- 1850 MHz and the 2025-2110 MHz bands. This element is dependent on a change being accomplished to the US Table of Frequency Allocations to incorporate FIXED and MOBILE Federal use on a primary basis with associated amplifying footnotes that have been coordinated with the FCC. The selected systems that will be modified to operate in both the 1780-1850 MHz and the 2025-2110 MHz bands include: <ul style="list-style-type: none"> • Army Unmanned Aerial Systems (UAS) • Army Other 4 • Army Tactical Radio Relay (TRR) • Army Video
2	DoD will modify selected systems to operate in other existing Federal bands as identified in its September 2011 Feasibility Study: <ul style="list-style-type: none"> • Army Microwave Links to 7125-8500 MHz
3	DoD systems will continue operations in the 1755-1780 MHz band on a shared basis with commercial users as follows: <ul style="list-style-type: none"> • Satellite Operations (SatOps) will remain in the 1755-1780 MHz band as interference from SatOps to commercial broadband operations can be managed with relatively short separation distances until there is advancement in technology that would enable commercial systems to tolerate or avoid interference in order to totally eliminate separation requirements. • Electronic Warfare (EW) (on a non-interference basis) • Army Other 8, at six key sites identified in the DoD Feasibility Study. Protection distance from perimeter of installations up to 130 km. Refer to tables provided below.
4	DoD will plan to compress the remaining operations into the 1780 - 1850 MHz band.
5	DoD will consequently not require access to the 5150-5250 MHz band, thus allowing the FCC to modify its current rules to expand the use of unlicensed mobile broadband devices in this band.
6	Per the CSMAC WG4 recommendations, the assignments provided below will be vacated when wireless indicates they plan to deploy within the CSMAC protection distances identified below and the new assignments for relocation are approved. The DoD Portal will provide the notification mechanism for all wireless deployments. The DoD Portal timeline for availability to coordinate for deployments is 12 months following the auction close.
7	*****
8	Army Microwave Systems. Recrystallize in 36 months and move to 1780-1850 MHz in order to make the 1755-1780 MHz band available to industry at the earliest opportunity. Complete move to 7/8 GHz within 120 months after initial funding. The move to 7/8 GHz is required to enable other highly mobile ground and airborne DoD systems to maximize compression into the 1780-1850 MHz band. The prioritization of locations for this program to transition operations out of the 1755-1780 MHz band will be made as consistent as possible with the industry provided market prioritization list from the CSMAC WG-2 Report. The Program Office will use the CSMAC prioritization to the extent feasible.
9	Army Robotics Systems. Compressing into 1780 - 1850 MHz band incurs a timeline up to 24 months. Will take up to 60 months to reconfigure radios in order to move into 4 GHz band.
10	Army UAS Systems. After initial funding, 50% of the systems will move after 36 months and 100 % Complete within 60 months of initial funding. The prioritization of locations for this program to transition operations out of the 1755-1780 MHz band will be made as consistent as possible with the industry provided market prioritization list from the CSMAC WG-2 Report. The Program Office will use the CSMAC prioritization to the extent feasible.
11	Army Video Systems. Will remain in band until deployment of commercial systems in the area of operation.
12	*****
13	For each of the frequency entries within Tab C that are labeled as "Vacate With Temp", the following stipulation applies. The concept of "temporary sharing" is subject to several conditions. These include: the requirement for the 1755-1780 MHz Early Entry Portal to be operational to handle coordination requests; coordination requests will be addressed on a site-by-site basis and sharing conditions shall be approved by the Military test/training range affected; sharing consideration will be assessed based on industry build-out/deployment plans and incumbent DoD operations; and a recognition that industry be aware that sharing may be assessed as not feasible for an extended period of time. Industry should not assume that a label of "Vacate With Temp" indicates that sharing for that frequency is in any way assured. The label only means that DoD is agreeable to determine if sharing is feasible in response to individual industry coordination requests.
