</table>
This transition plan identifies the funds required to replace video surveillance systems used during investigations by the Department of Veterans Affairs Office of Inspector General (OIG) in support of making the 1755-1780 MHz band available for auction.

The VA OIG is currently divided into 7 regions throughout the Continental United States. Each region has a field office and several smaller resident agency offices (sub-offices) fall under the direction and control of the regions field office. All the equipment is located at the main office. When the main field office is transitioned over to the new spectrum, all the resident agencies are transferred as well because they utilize the equipment housed in the main field office.

The alternate radio frequency assignments for the new assignment must be in one of the following bands. [1] C: 4400-5000 MHz [2] L: 1710-1850 MHz [3] S2/3: 2200-2400 MHz (specifically request 2200-2290 MHz)
